

The Catskill Game Farm has been a family enterprise since its beginning in 1933. Millions of visitors have enjoyed the close contact of exotic animals in a relaxed, country atmosphere. We exhibit approximately 2000 animals, representing over 150 different species from all parts of the world. Through careful conservation and extensive breeding programs, many endangered species have been preserved. Our efforts have enabled us to reintroduce nearly extinct animals back to the wild. It is the endeavor of the owners to build a bigger and better Game Farm for the enjoyment of future generations.

A half-mile train ride is available to take you through the bird garden and to the upper level. The train makes one stop by the cafeteria, and continues on to tour the rare goat collection. Memorial Day weekend through Labor Day, animal shows are presented daily. The newest addition to the farm is the Splash Pad. It is an interactive water-play area for children and adults as well. Here families may relax in lounge chairs and sun-bathe on the deck. Refreshments are available. The farm has a large cafeteria and snack bars throughout the park. Picnic facilities are also available. Parking is free.
